Ambitech Engineering Corporation

To whom it may concern, My name is Mark LaRosa, I'm a PM with Ambitech Engineering in Downers Grove, IL. I spent 1.5 years (Sept 2016-Jan. 2018) managing Expense and Capital projects for a 24/7/365 Adhesives Plant in Grand Rapids. It did not take me long to notice the above and beyond quality and professionalism from Kent Material Handling and their Superintendent Dean LeMaire. I used Dean and his contractors at least twice a month without incident. Their professionalism, Safety and work ethic is very impressive. There is no doubt that I would highly recommend Dean, Kent Material Handling and their contractors for any industrial, chemical or Food Manufacturing facility project work. If further detail is required please do not hesitate to reach out to me.

Thank You,

Mark A. LaRosa
Project Manager

BP&R Engineering, Inc.

456 Century Lane
Holland, MI 49423

To whom it may concern,

As President and owner of BP&R Engineering and Construction, I would like to highly recommend Ron Le Mire, with Kent Material Handling. Ron possesses a great knowledge of filling and product conveying systems, as well as being dedicated to helping with the design of systems from pre-engineering to implementation. I have found Ron always prompt in getting necessary equipment information and very helpful in designing systems in a very cost effective manner.

Sincerely,

Chris Brechting
President/Owner
BP&R Engineering, Inc.
BP&R Construction, Inc.

To whom it may concern:

I have worked with Ron LeMaire of Kent Material Handling for over 15 years, and I recommend him without any reservations to anyone with any material handling needs. You cannot get better service up front, helping to select the best, most cost effective solutions to your needs, but also exceptional support after the sale. I have purchased conveyors from him for our local plants in West Michigan, our plants in California, and also our plant in China. I get better support from Ron in California and China than I do the local suppliers. Again, I give him my highest recommendation.

Tim Nicholson
Engineering Supervisor
Access Business Group

7575 Fulton Street East Ada, Michigan 49355-0001

To Whom It May Concern:

I have worked with Ron LeMaire of Kent Material Handling for over 15 years. Ron has provided both packaging and processing conveyors to Amway Corporation and works with many of the engineers on complex.

I have found Ron to be of great support on many projects. While many vendors are willing to sell product, what sets Ron apart is his level of service. I can always count on Ron to provide excellent service, much of the time on the same day as called.

If you have any questions or need more information, you can call me at 616-787-7865 or my email is karl.iberle@amway.com.

Regards,

Kent Matl. Handling
Ron LeMaire
5590 Kies NE
Rockford, Mi. 49341

To Whom It May Concern:

As Team leader of the Kaizen Support Team, I have done business with Kent Material Handling for the past 7 years. Ron LeMaire is very knowledgeable in his field. Ron has been very helpful in specking equipment, getting quotes and making sure orders are shipped on time. During this time, Kent Material Handling and Ron LeMaire have made it very clear that Customer Satisfaction is a top priority. My experience with this company, its products and its associates has been very satisfactory.

Sincerely,

Dennis Pajak

We have worked with Ron LeMaire and Kent Material Handling for the past 10 years on various bottle handling projects. We are an OEM of blowmolding machines and molds, and have utilized equipment supplied by KMH for projects in 12 countries. We have found the technical and commercial support provided by KMH to far exceed any conveyor supplier we have used in the past. In our business, we sometimes find that the facilities information provided by our customer is not always accurate, and we are forced to make adjustments to the machine line layout when the equipment arrives at the customer's factory. I have personally contacted Ron from several countries with this type of problem, and have received excellent advice on how to make the necessary changes and in some cases contact information for local suppliers that can help resolve the problem.

I am confident that any company that chooses KMH as a supplier will be as satisfied with their service as Uniloy has been.
